Step 3: After authentication, you can able to see options to choose language, Voice and area to write the text.

Step 4: You can select the language in which to create sound using 125+ language options.

Step 5: After language selection, you can see a list of available voices to select according to your requirement.

Step 6: You can preview the voice demo by clicking the "Preview Voice" button. Type your text into the given box.

Step 7: Click Generate Audio to create the audio for the input text. Audio will be automatically added to your work timeline.

Step 8: You can also create multiple audio as required in a single video clip.
